

AV70S3

Feature

The monitor has a 7 inch colour LCD Digital Screen giving high brightness and high contrast display. The digital screen high resolution provides for crisp video image. It has three video inputs and uses screw connectors that provide for the video and power to cameras over a single cable. The menu provides for setting cameras from normal to mirror view. Auto on feature is provided by three control wires (three cameras). This monitor is a multi-voltage capable unit, can be connected to power supply voltage between 11 ~ 32 V DC. At night the auto sense will illuminate the monitor control switches with a blue light. Comes with sunshade. Mounting is via U bracket or if required a slide dash mount is optional.
